Release of version 8.0 (Danny) meta-intel Board Support Packages

Hello All,

Intel Corporation is pleased to announce version 8.0 ("Danny") board support packages for Intel embedded platforms. Images with these BSPs can be built with the "Danny" release of the Yocto Project (i.e. Yocto 1.3).

These BSPs are available for download at the following locations:

x86: https://www.yoctoproject.org/downloads/bsp?field_download_processor_family_tid=23

x86-64: https://www.yoctoproject.org/downloads/bsp?field_download_processor_family_tid=24

Please note that the provided images were built using the meta-tlk layer (time limited kernel). Build instructions to build non-tlk images are provided in the meta-intel/meta-<bsp_name>/README file for these machines.

META-INTEL 1.3
===============

Repo: git://git.yoctoproject.org/meta-intel

Tag: 1.3
